Wheels

Get your wheels with your own graphic, for your accessory line, or completes. Five different shapes available in many sizes to satisfy you the customer's demand. Printable up to 4 colours. Possibility to pack the wheels with your stickers or label.

Shr 80A

Shr 78A

Shr 82A

Shr 84A

Nebula

60 x 40mm Sanded

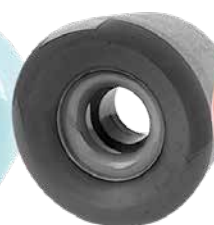

The best wheel to move around. Small, light but fast, the Nebula is available in four hardness, so you can decide how much you would like to slide. The 78A and 80A duos give you a comfortable ride and more controlled slides at higher speeds. The 82A and 84A duos are perfect to go faster and skate grippier roads.

Shr 84A

Shr 78A

Shr 80A

Shr 82A

Fractal

70 x 47mm Sanded

The ultimate freeride wheel. The fractal is our fastest freeride wheel. The special formula of this wheel makes the slides predictable for any kind of rider. The core shape is specially designed to give you the fastest ride but keeping the control you need to slide at high speeds. The 65mm is thinked up for a versatile freeriding and it is perfect to set up any kind of board and shape.

Shr 80A

Shr 78A

Shr 84A

Lynx

62 x 46mm Smooth

Drive your city with the Lynx. The perfect wheel to pump and carve around the city. The Lynx is perfect for small cruiser boards. The wider shape gives you a comfortable and stable ride while turning. Choose your hardness depending on the grip you are looking for or on the kind of surfaces you want to skate.

Shr 78A

Shr 80A

Shr 82A

Crop 66

66 x 50mm Smooth

The best way to feel the traction, carve and pump harder than ever with the crop. The 66mm Crop is perfect to feel the grip in the city, a wide wheel, with sharp edges but still fast and reactive. The wheel is perfect to be set up in any kind of board and shape.

Shr 82A

Shr 78A

Shr 80A

Shr 84A

Crop 70

70 x 57mm Smooth

The best way to feel the traction, carve and pump harder than ever with the crop. The 70mm Crop is perfect for all those riders who want to feel the speed. Just choose your favorite hardness and enjoy the smoothness of the Crop.

LEAN TRUCKS

150MM & 180MM HANGER

Lean Trucks performs with two different hanger sizes. Choose yours depending on your board's width and the balance you would like to feel between turn, grip and stability.

The bushing seats are specially designed to bring you a lineal turn. The front side of the hanger has an opened bushing seat, bringing you a wide lean for close turns and carves. The back side of the hanger has a closed bushing seat, providing control and stability when you need them the most.

2MM RAKE AXLE

Both hangers include a 2mm rake axle, which means that you will have more set up options. The rake gives you a non-centered axle, so depending on the way you place your hanger you will feel more or less transmission.

2 WHEELBASE POSITIONS

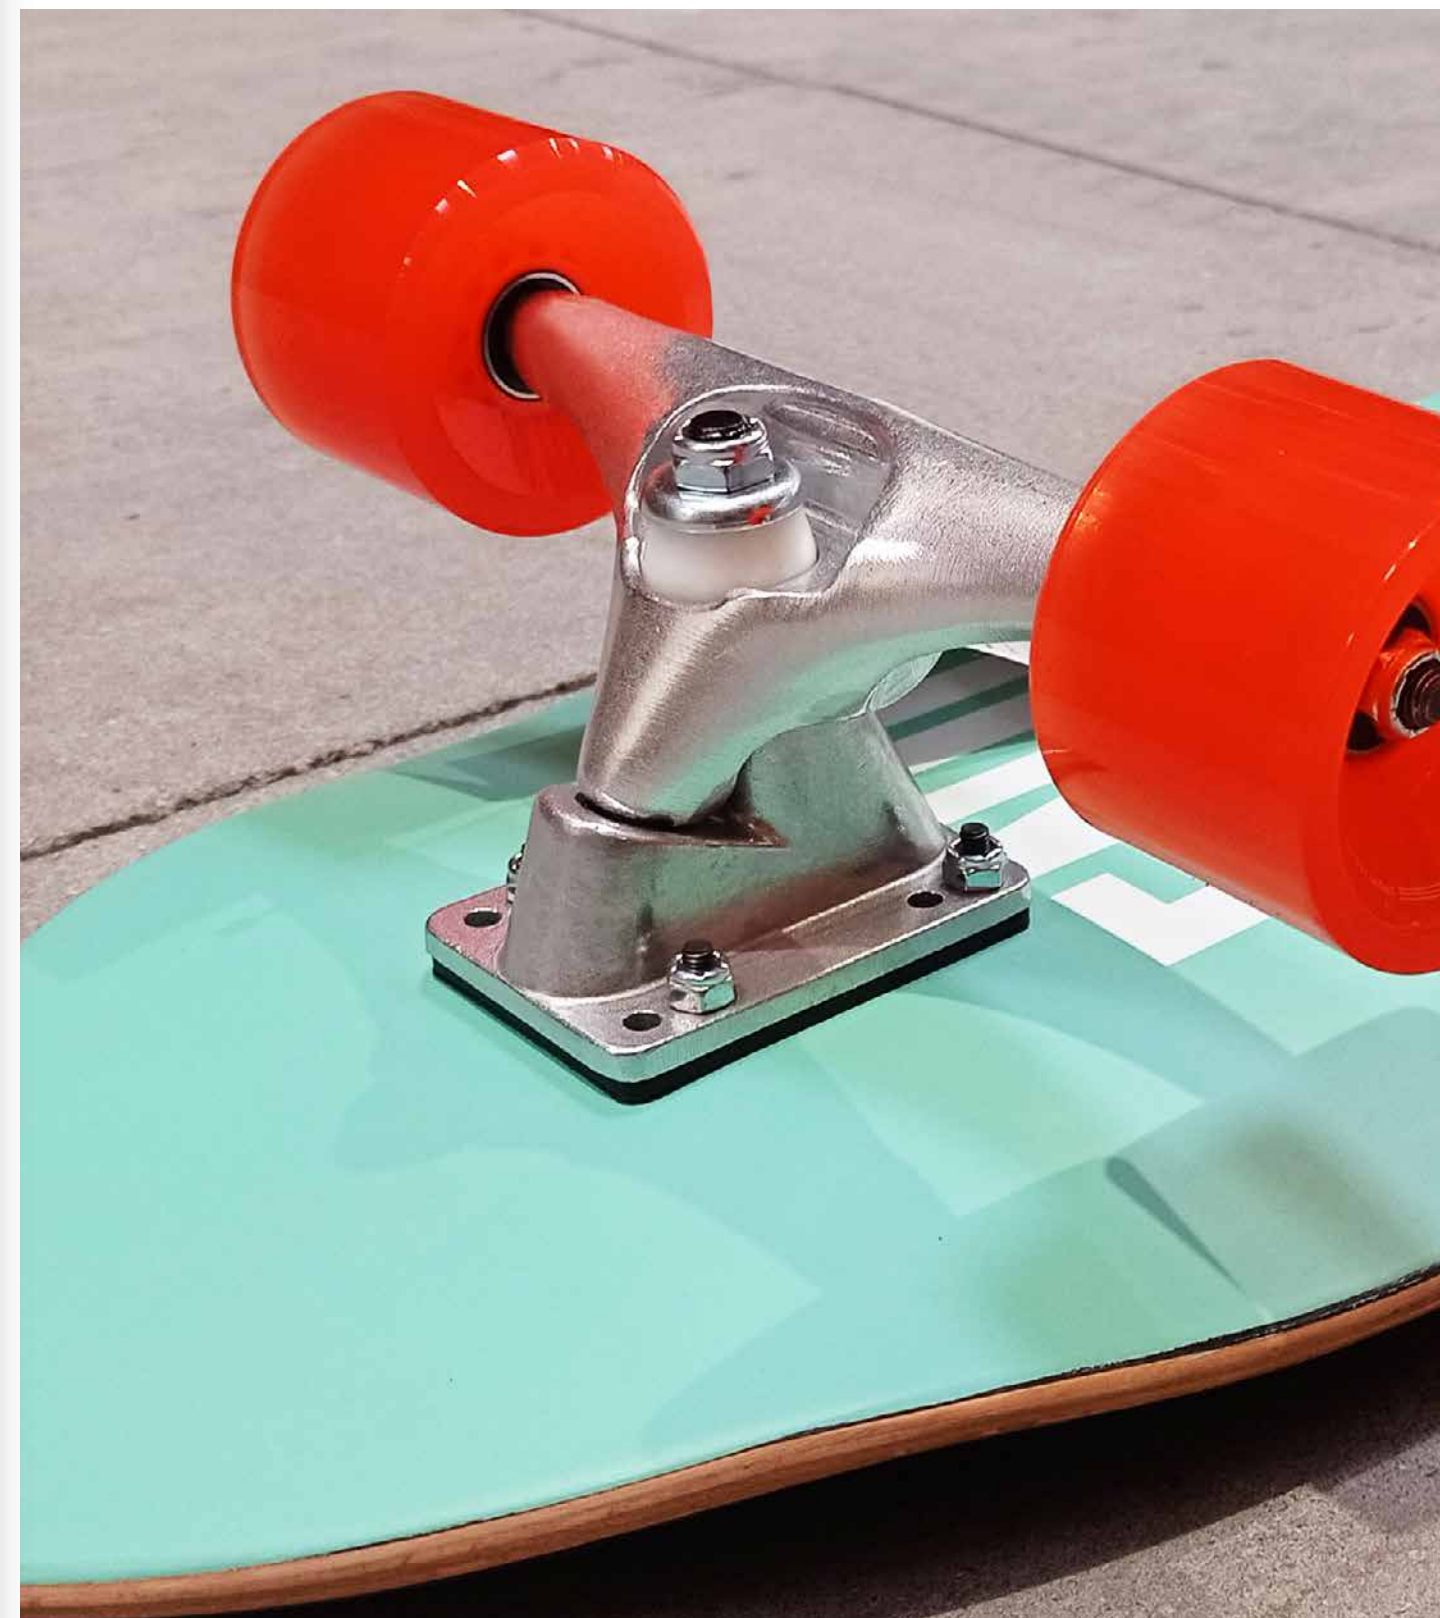

Eight holes for two different wheelbase position, so you will be able to get even more set up options for your ride.

50° BASEPLATE

The Baseplate of the truck is designed to use a 50° King-pin, which brings wide and progressive turns while keeping the stability you will need at high speeds.

92A CONE & BARREL BUSHINGS

All the Lean Trucks are coming with a 92A Red Cone and Barrel Bushings, manufactured with our special High Rebound Formula and using the industry standard barrel and cone bushing sizes, so you will be able to configure your truck with your own bushings set up.
